SUMMARY

Software engineer with five years of production experience, most recently on agent harnesses and AI tools. At Placemaking AI I built TypeScript agent harnesses with tool calling, agent loops, and structured outputs over 106M+ points of interest, plus the microservices behind them. I design for model errors, timeouts, and flaky networks, and I have built microservices and AI tools over EVM and Solana data for web3 clients using libp2p, IPFS, and WebRTC.

CONSULTING ENGINEER

2022 – 2026

Placemaking AI *Real estate intelligence, 106M+ points of interest*

- Built TypeScript agent harnesses with tool calling, agent loops, and structured outputs over the POI data.
- Designed AI tools and modules that expose the platform's data to users and to other services.
- Built the microservices behind the AI layer, plus the big data pipelines and data science workflows feeding it (Python, FastAPI, LangChain, AWS).

Web3 clients *Numerous consulting projects*

- Led the microservices and LLM based AI tools over EVM and Solana data, in TypeScript and Python.
- Worked with P2P protocols: libp2p, IPFS, and WebRTC.

Mole *AI utility detection used by government agencies*

- Built FastAPI inference and Supabase infrastructure for a deep learning ensemble on GPR survey data.

CO-FOUNDER & LEAD SOFTWARE ENGINEER

2021 – 2026

Bronix · 50+ completed projects

- Built VoltAgent agent harnesses with tool calling, multi step loops, context management, and structured outputs.
- Shipped LLM features across 10+ apps via OpenRouter, Claude, and OpenAI, with retries, timeouts, model fallbacks, and graceful degradation when a provider fails.
- Led engineering on 10+ products from architecture to launch on the App Store, Google Play, and the web.

SELECTED PROJECTS

SeriesStudio OPEN SOURCE
Multi agent pipeline chaining script, storyboard, and render agents to turn a series idea into full video episodes.
TypeScript · VoltAgent · Docker

Walkable LIVE ON IOS
Agentic pipeline that scores streets by walkability and safety. No account, and location never leaves the device.
VoltAgent · Flutter · Firebase

Banana Labs LIVE ON WEB
AI creative studio that runs several generative models in parallel and compares results side by side.
Next.js · Express.js · Fal.ai · OpenRouter

SKILLS

AI & Agents	Agent Harnesses, Tool Calling, Agent Loops, Context Management, Structured Outputs, VoltAgent, LangChain, OpenRouter, Claude API, OpenAI API
Languages	TypeScript, JavaScript, Python, Go, Dart, SQL
P2P & Web3	libp2p, IPFS, WebRTC, EVM, Solana
Backend & Infra	Node.js, Express, Hono, FastAPI, PostgreSQL, Redis, Docker, AWS, Supabase, Firebase
AI Dev Tools	Cursor, Claude Code

EDUCATION & AWARDS

B.Sc. Mechanical Engineering *Bilkent University, Ankara* 2016 – 2021

Best Paper Award, TORK 2019 *Foldable modular miniature robots research* 2019
