SUMMARY

Backend engineer and one of the founders of Bronix, with years of production experience building APIs, data pipelines, and microservices in Go, Python, and Node.js. I have delivered backend systems for more than ten consumer products as well as enterprise platforms, including a pipeline that processes over 106 million points of interest and an AI inference service used by government teams for underground utility detection. I design for scale and reliability, but I keep things simple enough that the next person can actually maintain them. Performance problems are the kind I genuinely enjoy chasing down.

EXPERIENCE

Co-Founder & Lead Software Engineer · *Bronix Software Inc.* · *50+ completed projects* 2021 – 2026

- Designed and built REST APIs for consumer mobile apps in Node.js (Express/Hono) and Go (Fiber).
- Managed PostgreSQL databases, Redis caching, and Docker deployments on Railway and AWS.
- Built serverless functions and event pipelines powering product analytics and behavioral data.

Consulting Engineer — Backend & Data · *Mole* · *Placemaking AI* 2022 – 2026

- Placemaking AI: Architected microservices processing 106M+ POIs, with ETL and data science pipelines.
- Mole: Built a FastAPI inference pipeline for a deep-learning GPR utility-detection model (MEDAS).

SELECTED PROJECTS

Placemaking AI **Live on Web**
Microservices backend and ETL pipelines processing 106M+ points of interest for a real estate intelligence platform. — *Python, FastAPI, PostGIS, AWS*

Mole **Live on Web**
AI inference backend detecting underground utilities from GPR data with a deep-learning ensemble. — *FastAPI, Supabase, Docker*

YükAl **Live on iOS, Android & Web**
Freight marketplace backend: Express.js REST API on Railway backed by Supabase and PostgreSQL, powering matching and subscriptions. — *Node.js, Express, Supabase, PostgreSQL*

Banana Labs **Live on Web**
Backend orchestrating parallel AI model calls across providers, with job queuing, result caching, and side-by-side delivery. — *Express.js, Supabase, Fal.ai, OpenRouter*

SeriesStudio **Open Source**
Agentic pipeline orchestrating multi-step video generation, chaining scripts, storyboards, and rendered MP4 scenes. — *VoltAgent, Docker*

SKILLS

Languages: Go, Python, TypeScript, JavaScript, SQL

Frameworks: Go Fiber, FastAPI, Django, Express.js, Hono, Node.js

Databases: PostgreSQL, PostGIS, Redis, MongoDB, Supabase, Firebase

DevOps & Cloud: Docker, AWS, Railway, Vercel, Firebase Functions, Supabase Edge Functions

AI & Data: LangChain, VoltAgent, OpenRouter, Fal.ai, Apify, ETL Pipelines

EDUCATION

B.Sc. Mechanical Engineering · Bilkent University, Ankara, Turkey · 2016 – 2021

High School Diploma (International Baccalaureate) · TED Ankara College, Ankara, Turkey · 2012 – 2016

RESEARCH

Undergraduate Researcher · *Bilkent University — Miniature Robotics Laboratory* 2018 – 2021

- Researched miniature modular robotics: foldable mechanisms and flexible spine module design.
- Best Paper Award, TORK 2019, for "Flexible Spine Module Design for Foldable Modular Miniature Robots".
