SUMMARY

Mobile engineer and one of the founders of Bronix, where I shipped more than six Flutter and Expo apps to the App Store and Google Play. I know Flutter and Dart deeply, from Firebase integration and RevenueCat subscriptions to the full release cycle on both iOS and Android. When a product needs a backend or a web dashboard, I build that too, so nothing stalls waiting on someone else. Enough launches have taught me that the last ten percent is where the real work hides.

EXPERIENCE

- Integrated RevenueCat for subscription billing and in-app purchase management.
- Built Firebase-backed real-time features: Auth, Firestore, Cloud Messaging, and Storage.
- Embedded AI features including on-device Fal.ai image generation and agentic navigation via VoltAgent.
- Managed App Store and Google Play releases; analyzed user funnels and churn to prioritize iterations.
