SUMMARY

Software engineer with five years of building and shipping real products, from mobile apps to AI agent systems. As a consulting engineer I built TypeScript agent harnesses and microservices for Placemaking AI and web3 clients, and as one of the founders of Bronix I led engineering on more than ten of our own products. I care about owning outcomes and do my best work where engineering and product meet.

HIGHLIGHTS

- Co-built Bronix into a software studio with 50+ completed software engineering projects, including 10+ of our own products on the App Store, Google Play, and the web.
- Built YükAI, a nationwide freight marketplace with 10,000+ registered carriers and 600,000+ listings.
- Architected microservices and data pipelines processing 106M+ points of interest for Placemaking AI.
- Built the inference backend for Mole, a deep learning platform locating buried utilities, used by government agencies such as MEDAS.
- Best Paper Award, TORK 2019, for research on foldable modular miniature robots.

CO-FOUNDER & LEAD SOFTWARE ENGINEER

2021 – 2026

Bronix Software Inc. · 50+ completed projects

- Built VoltAgent agent harnesses with tool calling, multi step loops, context management, and structured outputs.
- Shipped LLM features across 10+ apps via OpenRouter, Claude, and OpenAI, with retries, timeouts, model fallbacks, and graceful degradation when a provider fails.
- Led engineering on 10+ products from architecture to launch on the App Store, Google Play, and the web.

CONSULTING ENGINEER

2022 – 2026

Placemaking AI *Real estate intelligence, 106M+ points of interest*

- Built TypeScript agent harnesses with tool calling, agent loops, and structured outputs over the POI data.
- Designed AI tools and modules that expose the platform's data to users and to other services.
- Built the microservices behind the AI layer, plus the big data pipelines and data science workflows feeding it (Python, FastAPI, LangChain, AWS).

Web3 clients *Numerous consulting projects*

- Led the microservices and LLM based AI tools over EVM and Solana data, in TypeScript and Python.
- Worked with P2P protocols: libp2p, IPFS, and WebRTC.

Mole *AI utility detection used by government agencies*

- Built FastAPI inference and Supabase infrastructure for a deep learning ensemble on GPR survey data.

PRODUCTS

YükAI LIVE ON IOS, ANDROID & WEB

Freight marketplace that matches cargo owners with truck drivers across all 81 provinces. Free listing for shippers, subscriptions for carriers, with instant matching and route filters.

Expo · Express.js · Next.js · Supabase · Railway · OpenRouter

Next2Me LIVE ON IOS

Relationship app for couples with daily streaks, a shared drawing board, 3,000+ conversation questions, swipe to match on movies, food, and activities, and private encrypted chat. One subscription unlocks premium for both partners, and a couple calendar keeps shared plans in one place.

Flutter · Firebase · Railway · OpenRouter

NextRoom LIVE ON IOS

AI interior design that redesigns any room, exterior, or landscape from a single photo, using 12+ curated styles or a custom prompt.

Flutter · Firebase · Railway · Fal.ai

Walkable LIVE ON IOS

Walking navigation that uses an agentic pipeline to color code streets by walkability and safety. No account needed, and location never leaves the device.

Flutter · VoltAgent · Firebase · Supabase

Toxic Flamingo LIVE ON IOS
A task manager with attitude that uses AI to nag and roast you into finishing tasks, with Rage Mode, app blocking, and a Pomodoro timer.
Flutter · Firebase

Banana Labs LIVE ON WEB
AI creative studio for UGC videos, product shoots, and images that runs several models in parallel so results can be compared side by side.
Next.js · Express.js · Supabase · Fal.ai · OpenRouter

SeriesStudio OPEN SOURCE
Agentic pipeline that turns a few paragraphs describing a series idea into scripts, character sheets, storyboards, and rendered MP4 episodes.
VoltAgent · Docker

SKILLS

Languages	TypeScript, JavaScript, Python, Go, Dart, SQL
Mobile	Flutter, Expo, React Native, Firebase SDK, RevenueCat, FCM, App Store Connect, Google Play Console
Frontend	React, Next.js, Tailwind CSS, shadcn/ui
Backend	Node.js, Express, Hono, Go Fiber, FastAPI, Django, Firebase Functions, Supabase Edge Functions
Data & Infra	PostgreSQL, PostGIS, Redis, MongoDB, Firebase, Supabase, Docker, AWS, Google Cloud, Railway, Vercel
P2P & Web3	libp2p, IPFS, WebRTC, EVM, Solana
AI & Agents	VoltAgent, LangChain, Claude API, OpenAI API, OpenRouter, Fal.ai, Apify, RAG, Tool Use, Structured Output, Prompt Engineering
AI Dev Tools	Cursor, Claude Code
Product	Product Definition, Roadmapping, Product Analytics, Funnel & Churn Analysis, App Store Optimization, Subscription Monetization

EDUCATION

B.Sc. Mechanical Engineering *Bilkent University, Ankara* 2016 – 2021

International Baccalaureate Diploma *TED Ankara College, Ankara* 2012 – 2016

RESEARCH & AWARDS

Undergraduate Researcher 2018 – 2021
Bilkent University, Miniature Robotics Laboratory

- Researched miniature modular robotics, focusing on foldable mechanisms and flexible spine module design.
- Best Paper Award, TORK 2019, for "Flexible Spine Module Design for Foldable Modular Miniature Robots".
