Full Name: Ömer Başar Özgüven
Address: Mutlukent Mah./ 2044. Sok./ Altınşehir Sitesi/ NO: 23/ Çankaya/ Ankara/ 06810/Türkiye
Mobile: +90 531 269 11 05
E-mail: omerbasarozguven@gmail.com
Date & Place of Birth: 08.06.1998 - Ankara, Turkey

EDUCATION

2016-2021	**I.D. Bilkent University, Faculty of Engineering, Ankara, Turkey** B.S. in Mechanical Engineering, CGPA 2.80/4.00
2012-2016	**TED Ankara College Private High School, Ankara, Turkey** Science/Mathematics student International Baccalaureate Student for two years

RESEARCH EXPERIENCE

Jun 2018- Jun 2021	**Bilkent University Mechanical Engineering Department Miniature Robotics Laboratory** Undergraduate Researcher Researching on miniature modular robotics.
Jun 2019	**Published Paper at TORK 2019** N Mahkam, O. Ozguven, O. Ozcan (2019). "Katlanabilir Modüler Minyatür Robotlar İçin Esnek Omurga Modülü Tasarımı". 2019 International Conference on Robotics (TORK 2019). İstanbul, Turkey.

WORK EXPERIENCE

Jul 2017-Jul 2017	**Türksat A.Ş.** Engineering Intern - Research & Development Department
Jun 2018-Jul 2018	**FNSS Defence Industry Co. Inc., Ankara, Turkey** Engineering Intern – Production Department Involved in the assembly line, welding unit and machining unit of the factory.
Jul 2019-Aug 2019	**Aselsan A.Ş.** Engineering Intern – Radar Department Involved in calculations for bolt and screw selection
Feb 2021-Mar 2021	**Argedor Bilişim Teknolojileri** Engineering Intern Involved in Machine Learning, Mobile App Development and REST API
Feb 2021-Mar 2021	**Bronix Engineering Solutions** Software Engineer Involved in Machine Learning, Mobile App Development, REST API and Robotic Software Development

PROJECTS

- **Semi-Autonomous Drone for Finding Missing Children (ME481-482 Final Year Graduation Project)**
  Design of a quadcopter which can find missing children with its autonomous navigation, reconnaissance and target finding capabilities. The project was developed in collaboration with Bilkent University Kindergarten. Responsible for mechanical design, research and development of thermal camera technologies.
- **Gap Crossing Autonomous Car (ME384 Mechatronic Systems Term Project)**
  Fully autonomous, RC car capable of crossing gaps with path tracking feature. Responsible for mechanical design
- **GUI in MATLAB for Analysis 2D Thruss Structures (ME362 Finite Element Method Project)**

Programming a graphical user interface for analyzing 2D truss structures by using appropriate Finite Element Method.

- **Machine learning Algorithm for Detection of Lung Disease (ME464 Introduction to Machine Learning)**
  Developing machine learning algorithm which can detect whether a person suffers from one of 14 common lung diseases or not.

EXTRACURRICULAR ACTIVITIES

2016- 2017 **Bilkent University Mühendislik Topluluğu (MT)**
Member
Organized the "InCase 2016" and "YÖNET 2017" career events which brings together university students and professionals from industry for networking and trainings.

SKILLS AND ABILITIES

Computer: SolidWorks, Arduino, Raspberry Pi, MATLAB, Java, Python, Geogebra, Slic3r, Raspbian, Unity Game Engine, C, C#, C++, Dart, VS, Flutter, Android Studio, PostgreSQL, HTML, CSS

Language:

- Turkish - Native Language
- English - Native

OTHER INFORMATION

Personal Traits
Creative, task oriented, planner, perfectionist, coordinating, objective, certain, observer, curious, outgoing, self-disciplined

Hobbies & Interests
Game Developing, RC vehicles, Licensed Tennis Player (2008-2018), Sailing, Rock Climbing, Skiing, Kitesurfing, Amateur Pianist, Amateur Singer, Table Tennis
